WORK EXPERIENCE

Embed UX - Founder & Shopify Native Developer

Feb 2021 - PRESENT

I started Embed UX Market, a platform that creates personalized website sections for clients. These sections have different features like sliders, animated announcement bars, custom carts, and unique headers and footers. We can also redesign the whole theme to match what the client wants.

Technologies: JavaScript, API Integration, Shopify Liquid, HTML, SCSS, SEO

4Media Marketing

Feb 2022 - July 2023

I worked on an 80-person team as a front-end developer and SEO expert. My main job was turning design mockups into working websites. I also made it easy for clients to edit sections on their Shopify store by enabling simple changes like adding text or images.

Technologies: JavaScript, API Integration, Shopify Liquid, HTML, CSS, SEO

Project Yolo

July 2023 - PRESENT

Right now, I'm working on creating the Yolo landing page. We're carefully designing a custom Shopify theme to fit our client's special needs.

Technologies: JavaScript, API Integration, Shopify Liquid, HTML, SCSS, SEO
